

Primary Science Conference

Up and Atom! – Energizing Primary Science

Getting the intent and direction of your science curriculum right is crucial; as is understanding the importance of developing your pupils' science capital.

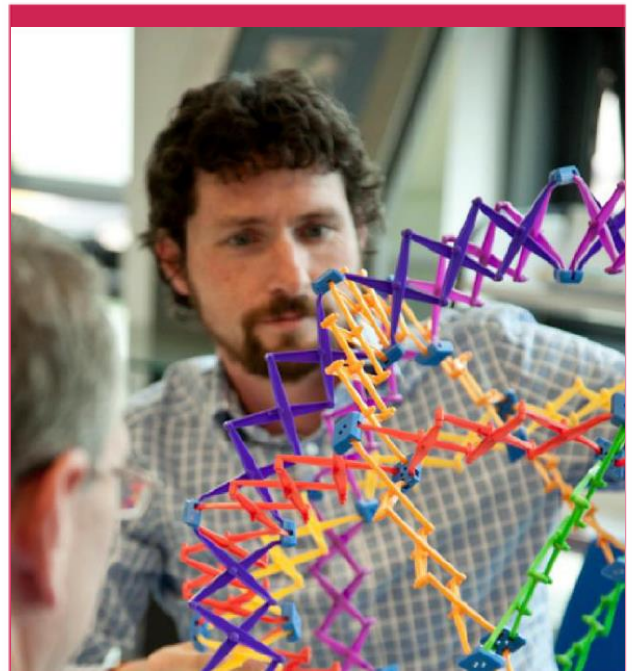

During this conference you will question how children best learn science knowledge and skills, how you can enrich your curriculum to engage, enthuse pupils and ensure science is a valued part of your school's curriculum offer. With a focus on the 5 types of enquiry, you will also have the opportunity during the day to immerse yourself in practical investigations to help bring science to life!

In collaboration with The Science Museum and The Garden Classroom, you will leave us with a clear vision for your school's science offer and effective CPD strategies to cascade into your setting.

Outcomes

You will learn how to:

- increase science capital and its impact on children's futures
- engage children through stimulating science enquiry
- enrich your science curriculum

Date: Tuesday 26th November 2019
9am-4pm
